

Preparation for Appointment

- Collect all medical records: they may be faxed or e-mailed to the office prior to your visit (some referring veterinarians may do this directly from their office).
- Bring actual medications or list of any pertinent medications. If you have any x-ray films, cd's, etc. please bring them to the exam.
- If you have an elizabethan collar (e-collar), always bring it with you for every appointment and/or procedure.
- Please try to not bathe your pet the week of your initial visit.
- Only scheduled allergy test (intradermal skin testing) patients must be off of all medications 2-4 weeks prior to the procedure.
- Only scheduled biopsy patients (surgical) should stop all medications one week prior to the procedure.
- Patients with ear disease should try not to use any topical medications for one week prior to the exam. If your appointment is sooner than a week, please stop medication 1-2 days before.
- Client information and patient history forms may be downloaded and completed prior to your arrival at RVD. These forms may be faxed or e-mailed to the office or you may bring them with you on the day of your exam.

Notes: _____

*** Please arrive approximately 15 minutes early so we can process your registration forms/records.

*** A consultation is necessary prior to any procedure (i.e. intradermal skin testing) so that your pet may be thoroughly evaluated.
